

034Motorsport Turbo Inlet Hose, MQB I4

034Motorsport's Turbo Inlet is the new standard in performance. This turbo inlet hose was engineered with performance in mind. Manufactured from reinforced silicone; for high flow, strength, light weight, and long lasting reliability.

Installation Spiciness Rating

(Mild)

Installation of your 034Motorsport Turbo Inlet is a straightforward process that will take approximately 30 minutes to complete.

Supplied Parts:

- 034Motorsport Turbo Inlet Hose
- (2) hose clamps

Tools Needed:

- 7mm socket
- 8mm socket
- Hose clamp pliers
- Two hands, and most of your fingers

About This Guide

This Install Guide documents the installation process on a 2019 VW Golf GTI. There may be minor differences with other vehicles, depending on specific vehicle, market, options, etc.

Getting Started

- Ensure you have all parts and tools required for installation by reading the complete Install Guide.

Step 1

Open Hood

Step 2

Using hose clamp pliers, loosen the stock clamp and move it up the tube, out of the way.

Step 3

Using a 7mm socket, loosen the hose clamp at the turbo inlet.

Hint: a flexible extension, or regular extension with a wobble will help with reaching the clamp.

Step 4

The stock inlet hose can now be pulled out.

Step 5

Comparison between the stock inlet hose, and the 034Motorsport Turbo Inlet Hose.

Step 6

Installation of the 034Motorsport Turbo Inlet Hose is the reverse of the removal of the stock hose.

Using an 8mm socket, tighten hose clamps to **4 in-lbs.**

Step 7

ENJOY!
