

### **EA888.3 Billet Oil Filter Housing**

034Motorsport's Billet Oil Filter Housing is a direct replacement to the factory plastic piece that can be installed in minutes. The black anodized 6061-T6 billet will last the lifetime of the vehicle and will add another layer of finish to your engine bay.

### **Installation Spiciness Rating: MILD**

Installation of your 034Motorsport Rear Sway Bar is a straightforward process that will take approximately 30 minutes to complete.

### **Supplied Parts:**

• (1x) 034 Billet oil filter housing

#### **Tools Needed:**

- 32mm Socket
- Torque Wrench

### **About This Guide**

This Install Guide documents the installation process on a MK7 VW GTI. There may be minor differences depending on specific vehicle, market, options, etc.

### **Getting Started**

Confirm you have received all the parts included with your purchase by reading the complete guide, if there are missing components, please contact:

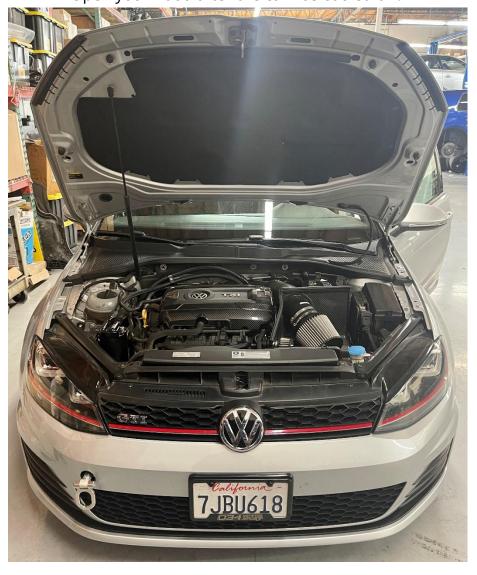

customerservice@034motorsport.com

\*Note: Allow sufficient time for the vehicle to cool off before starting the installation.\*

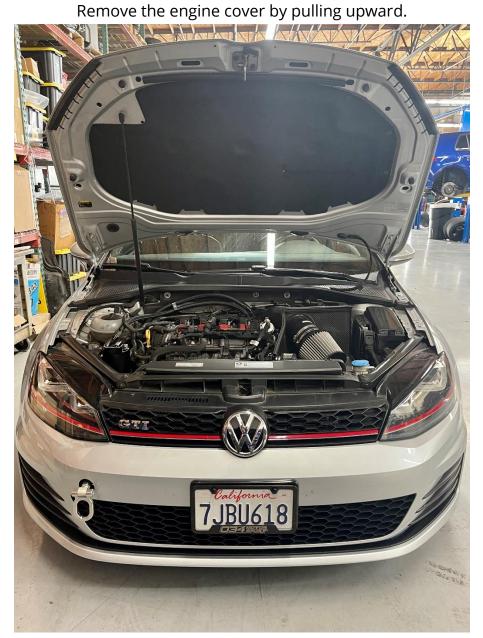

# **Install Steps**

**Step 1**Open your hood after the car has cooled off.

Step 2

### Step 3

Using a 32mm socket, remove the factory oil filter housing.

Step 4

Remove the oil filter from the housing. If you have the older version housing, be careful not to break the adapter valve.

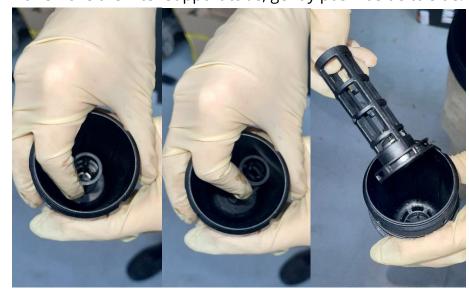

### Step 4 cont.

Here are both versions of the factory oil filter housings. Regardless of which one you have, the steps are the same.

Step 5

To remove the filter support tube, gently push it side to side.

Step 5 cont.

### Step 6

Install the filter support tube in the 034 billet oil filter housing by lining up the clips with the slots and push down. It will make a nice clicking sound when it connects.

**Step 7**Slide the oil filter over the filter support tube.

## Step 8

Coat the o-ring with a small amount of oil to prevent tearing.

### Step 9

Thread the 034 billet oil filter housing into the factory location.

Step 10

Using a 32mm socket, tighten the housing until snug.

Step 11

Torque the housing to 25Nm-30Nm.

Step 12

Put the engine cover back on and you are done.
